# 5 Ways to Keep Your Vehicle Running Like New

Car repairs are expensive. However, as Benjamin Franklin once said, "an ounce of prevention is worth a pound of cure." Take care of your car from the beginning, and it will run for a long time. Here are some tips:

- 1. Follow the manufacturer's maintenance schedule.** Somewhere in the mass of paperwork and booklets you received when you bought your car is a maintenance schedule. It will tell you when to change your oil and when to replace other parts of your engine.
- 2. Check your fluids and tire pressure.** Once a month or so, take a minute to open up the hood and check your fluids, including the oil, power steering fluid, etc. With the exception of the oil, you can see how much fluid you have with just a look at their respective reservoirs.
- 3. When you hear a noise, check it out.** Hear a squealing sound when you press the brakes? There might be dust on the brake pads, or you might need new ones. Either way, get it checked out right away to prevent costly repairs later.
- 4. Watch your driving.** Sudden stops and starts can take a toll on your engine and cause the components to wear out sooner than expected. Go easy on the gas and brake pedals and you'll keep your engine humming and may even improve your fuel economy as well.
- 5. Take care of your car.** A thorough cleaning, followed by wax, does more than make your car shine like new. It protects the paint by eliminating the dirt and grime that accumulates when you drive. Don't forget to vacuum and dust the inside of your car as well.

## Referral from Casey Whitworth "Seniors Realtor"

Kelsey Salerno - Mobile Mortgage  
Specialist

### Connecting Homeowners and Buyers to financing

White Rock, South Surrey, Cloverdale, Surrey, Delta, Abbotsford.

Committed to making your mortgage experience comfortable and easy, whether you are a first time Buyer or a seasoned Homeowner.

Kelsey is available outside of normal banking hours, to suit your schedule.

Here's a referral offered to my valued clients about a member of my business network. While I cannot guarantee the quality of the work, product or service which will be provided, I wholeheartedly believe that this business will meet or exceed your expectations. I have met with Kelsey on a weekly basis for many months. She is very professional and provides outstanding service. Share this with friends and family, especially those in South Surrey White Rock. If you need something, please give me a call or send me an email.

Use this referral for transferring a mortgage, refinance an existing mortgage to consolidate debt, purchase a home.

# What Does that Light Mean?

## Top Diagnostic Gadgets for Your Car

On-board car diagnostic gadgets tap into your car's computer so that you can track performance, diagnose problems and keep your car in top condition.

### CarMD® (\$119.85\*)

CarMD is an on-board diagnostic hardware system that helps you read the codes associated with your check engine light. When this light appears, CarMD will give you the code and tell you

what it means. Its Vehicle Health Report™ offers code definitions and emissions information, provides an estimate of parts and labor costs and sends service reminders to you via text or email. It also offers tips to help you extend the life of your car by reminding you of scheduled and recommended services. Visit [carmd.com](http://carmd.com) for more information.

\*Includes CarMD handheld device, software CD, USB cable, storage case and batteries.

### GoPoint BT1

(\$120, for Apple)

GoPoint BT1 sends real-time information from your 1996 or newer vehicle's computer diagnostic system to your iPhone, iPad or iPod touch. It translates your car's check engine codes, measures your fuel economy and gives you cost estimates when repairs arise. It works with the following iTunes apps to give you a full overview of your car's diagnostics:

**GoPoint app:** Decodes and translates your check engine light.

**mpgLINK:** Tracks your average total fuel economy.

**readyLINK:** Tells you if your car is ready for inspection.

**CARBonga:** Tests your vehicle's operating systems to make sure everything is in working order.

**DashCommand OBD II:** Pulls data from your car's engine control module to get all of your car's vital stats.
